

Alfa[^] systems

The definitive end-to-end platform for automotive finance

Alfa[^]

alfasystems.com

Alfa Systems is the number one software choice for automotive finance companies worldwide.

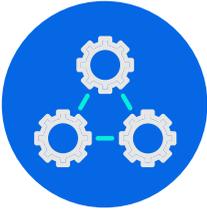

Live across four continents, our class-leading technology platform is at the heart of some of the world's largest and most innovative providers of retail and commercial lending and leasing, wholesale and dealer finance.

Alfa Systems is an end-to-end software solution, providing complete visibility and control across all elements of your business. Easily customised to suit your needs, Alfa Systems will streamline your processes, make your staff more productive, and inform your decisions.

With an excellent project delivery history over nearly three decades in the industry, Alfa's track record is unrivalled. Our best practice methodologies and specialised knowledge of automotive finance mean that we deliver the largest system implementations and most complex business change projects. Revolutionise your business with Alfa Systems.

Alfa Systems – the heart of your business

This is why our automotive clients, which include Mercedes-Benz Financial Services, Motability Operations and Toyota Financial Services, choose to work with us.

Consolidate
your systems

Access real
business insight

Realise
operational agility

Achieve smarter
compliance
automation

Create a
better customer
experience

Innovate and
challenge in
your market

Backed by futureproof technologies, our flexible platform is designed for scalability and growth; adapting as your business strategy evolves, and making day-to-day operations simple and more efficient.

Alfa Systems – a single platform

Key to the business case for each implementation is Alfa Systems' ability to consolidate multiple client systems on a single platform. An end-to-end solution with integrated workflow and automated processing using business rules, the opportunities that Alfa Systems presents to auto finance companies are clear and compelling.

Point of Sale

- Web-based quotation and pipeline management
- Fully configurable vendor and customer relationships
- Supporting multiple channels and devices

Originations

- Automated credit decisioning with manual underwriting support
- Workflow and business rules-configured processes
- Document generation, storage, tracking and e-signature support

Contract Management

- Leases and loans
- Customer, asset and contract management
- Reporting and Business Intelligence
- Bad debt management

Wholesale

- Dealer portal
- Entire unit lifecycle
- Audit

Business Support

Completely configurable to your requirements, our business support modules let you take your operation to places not usually served by traditional platforms.

Complex operations are managed in Alfa Systems by simplifying the running of multiple business lines in multiple regions for different brands.

Day-to-day operations, including asset and delinquency management, end-of-contract activities and general ledger, are handled through dedicated functionality.

Technical Platform

Alfa Systems features a browser-based user interface and is built 100% in Java. Its comprehensive service-oriented architecture allows easy integration into your business, with the custom-designed Gateway module enabling you to design your own API into the system. Using a single database, Alfa Systems provides reliable, scalable, proven performance for portfolios of over 10 million contracts.

Powerful workflow and business rule capabilities allow your processes to be mapped directly into the system and standardised across the business, automating activities wherever possible. Document management features let you integrate with any dedicated solution or use your own templates, while an embedded, real-time operational data store provides a dedicated reporting environment and supports easy integration with enterprise reporting tools.

Cloud hosting

Alfa Systems is a fully managed infrastructure stack hosted in the cloud, with rapid scalability and geographical flexibility.

Flexible integration

Suitable for all volumes

Comprehensive system monitoring

Fully ISO-compliant

High availability

Data centres in the US, Europe, Hong Kong and Asia-Pacific

Public, private and hybrid options

Networking, hardware, OS, database management and middleware

If required, Alfa Systems can also be hosted as an on-premise deployment, keeping application support, monitoring and availability under your control.
